

the proposal

to backfill the
west pit
and restore the
area for farming
use

COMMUNITY INFORMATION DROP-IN SESSION

about us

Nagambie Resources Limited (NRL) is an ASX listed company operating in the gold exploration and extractive materials industries.

Based in Nagambie, we undertake gold exploration in the region and produce quarry materials at our mine site in Zanelli Road.

The company is owned by public shareholders.

the proposal

NRL is proposing to backfill a legacy open pit and rehabilitate the area for farming use. It is proposed to backfill the pit with **Potential Acid Sulfate Soil and Rock (PASS)** and cover the PASS with a 3 m thick impermeable clay cap.

PASS will be generated in large quantities from Melbourne's major infrastructure projects in the coming years, presenting an opportunity to reuse this material.
